Programming Languages

JavaScript · TypeScript · PHP · Python · SQL · GraphQL

Tools & Frameworks

React · React Native · Vue · Angular · Next.js · Nuxt · Node.js · Django · Flask · Laravel · Shopify · Nest.js

STRENGTHS

● **Proactive**

I am not afraid to offer new ideas for projects, workflow, or client's culture.
I do not hesitate to ask for help or guidance if I find something unclear.

● **Teamwork**

I am not just committed to my own development, I also care about helping other developers improve. I am willing to teach, answer questions, and write documentation that favors teammates both in their business and in the wider developer community.

👤 SUMMARY

- Forward-thinking full-stack software engineer with 8+ years of experience developing web and mobile applications and back-end systems.
- Highly experienced in all aspects of the software development lifecycle and end-to-end project management, from concept through to development and delivery.
- Proficient in writing reusable, testable, and efficient code to develop scalable, secure, and high-performance applications.

👤 EXPERIENCE

Freelancehunt — Odessa, Ukraine
Senior Full Stack Developer — 04/2022 - 01/2025

Freelancehunt is the most popular freelance service in Ukraine. The main focus of the marketplace is all areas in which remote cooperation.

- Developed reusable React components and custom hooks, resulting in a 50% reduction in development efforts across 3 different projects.
- Improved loading times by 30% and enhanced overall performance by implementing caching techniques, browser optimization techniques, and GZIP compression.
- Engineered the migration of a monolith GraphQL API to microservices architecture using Apollo Federation and Nest.js.
- Enabled high scalability and agility by integrating AWS technology (Lambda, ECS Fargate) and infrastructure code frameworks (Terraform, Serverless).
- Translated business requirements into technical specifications by applying in-depth knowledge of software development life cycle.

Torgsoft — Kharkiv, Ukraine
Senior Software Engineer — 12/2018 - 03/2022

Torgsoft has compiled a rating of the largest marketplaces in Ukraine based on the Ukrainian Business Award research in 2023.

- Implemented customer-facing user interface (UI) and back-end services for various business processes, including calendar integration, metrics, discounts, stripe integration, and client rescheduling.
- Built 10+ custom React hooks for sharing reusable logic between functional components.
- Enhanced user experiences (UX) by updating 20+ components to match the latest design style guide, while adding animations to refresh the mobile app's overall look and feel.
- Collaborated with design and development teams to revamp the product's visual identity and improve user experience by implementing new design patterns and animations.
- Re-engineered critical modules within a sprint to rely on a centralized library to optimize performance by 28%

STRENGTHS

- **Application scalability emphasis**

  Skilled in building scalable, efficient, and user-friendly web applications.

- **Time management**

  Good time management allows me to accomplish more in a shorter period of time, which lets me take advantage of learning opportunities and helps me focus, which leads to more career success.
